### Non-consolidated operating difference

We hereby notify you that a difference has arisen between the consolidated business results for the fiscal year that has just ended (April 1, 2013 to March 31, 2014) and the prior fiscal year (April 1, 2012 to March 31, 2013).

#### Difference in non-consolidated operating results

	Sales	Operating income	Ordinary income	Net income for the quarter
FYE March 2013 (A)	(Millions of yen) 4,976	(Millions of yen) 511	(Millions of yen) 920	(Millions of yen) 495
FYE March 2014 (B)	5,811	1,014	1,367	936
Change in value (B – A)	834	503	447	440
Percentage change (%)	16.8	98.5	48.6	88.8

#### Reason for the difference

Thanks to higher sales of chemicals for use with displays or package PCBs compared with the prior fiscal term and because we revised the sales price of chemicals to our subsidiaries, our sales and operating income, ordinary income and net income for the quarter all exceeded those of the previous year.
